Landwehr Wassertechnik GmbH

The LANDWEHR Wassertechnik GmbH is a well-established market leader in the field of swimming pool water treatment. Our range of services includes the production and direct marketing of mounting parts, containers and other products as well as comprehensive engineer-, service- and maintenance services. As a performance-oriented partner in the area of water technology Landwehr Wassertechnik GmbH offers extensive maintenance services. We are the right maintenance and service partner for municipal and private operators for all types of swimming pools and water treatment plants. Our qualified, reliable and flexible service team is at your disposal.

Maintenances & services

Based on profound technical knowledge we offer the following services in the field of water treatment:

Maintenance:

- ▶ Swimming pool technology, water treatment plants
- ▶ Aggregates: Pumps, compressors etc.
- ▶ Measurement and control devices for hygiene parameters
- ▶ Dosing systems for all chemicals
- ▶ Disinfection systems (Chlorine gas, chlorine electrolysis systems)
- ▶ Control and regulating systems

Service:

- ▶ Remedial action service (24h)
- ▶ Fulfillment of service orders
- ▶ Inspection and optimisation of process technology
- ▶ Commissioning and decommissioning of plants
- ▶ Calibration of measuring instruments
- ▶ Analytics and assessment of water-quality
- ▶ Technical operation management

Qualification and quality management

- ▶ Specialised company, according to §19 I Water Resources Law (WHG)
- ▶ Producer qualification according to DIN 18 800-7; 2008-11 class D
- ▶ On-site rebuildings and plant maintenances are performed competently, considering conformance to all technical and legal standards
- ▶ Conformance to quality requirements according to DIN EN ISO 3834 part 3
- ▶ Conformance to requirements according to health protection and operational safety: German operational safety management system (AMS) – BG seal of quality

Service- and maintenance contracts

On the safe side with a Landwehr Wassertechnik partnership!

With a conclusion of a Landwehr Wassertechnik maintenance contract you choose operational reliability of your plants with an optimised water quality and as a result an explicit reduction of operating costs!

Your plants are subject to regular, load dependent and condition-based maintenance and inspection by our service technicians. The results of each inspection and maintenance will be comprehensibly documented on-site in form of a checklist for you. The competence and readiness for duty of our service technicians will ensure sustainable operational safety and availability of your plants for the entire service interval.

Technical operation management

The daily operation and the regular maintenance of water treatment plants is a complex task, which demands on competence and the availability of the technical operations staff. The Landwehr Wassertechnik GmbH has extensive know-how in this field.

Our team offers you besides an annual maintenance service, also an ongoing supporting partnership. The scope of this service offer is designed purposefully to your individual needs and desires, ranging from coaching and training your operating staff for a recurring execution of regular work (e.g. calibration of instrumentation and optimisation of operational settings), to secure and optimise the plant operation 24 hours, 365 days a year.

Our services to your advantage:

- ▶ Ensurance of a sustainable economic and proper plant operation
- ▶ Plant system support and emergency service through our service technicians or by remote dial-in
- ▶ Verification of functionality and efficiency, and optimisation of business processes
- ▶ Assessment, scheduling and execution of upcoming repair work
- ▶ Qualification of your staff
- ▶ Reduction of operating costs
- ▶ Reduction of operating resources
- ▶ Regulatory compliance

Our staff and customer service would be happy to support and advise you in your selection of a proper contract option. Please do not hesitate to contact us!

Employee qualification

- ▶ Welding performance qualification for plastics after German DVS 2212 in the subgroups I/4.1, 5, 6.1; II/1.1
- ▶ Adhesive bonding qualification for plastics after German DVS 2221
- ▶ Welder's performance qualification after DIN EN 287 part 1

Additional services

Swimming pool technology, waterworks engineering, fountain technology, industrial services, plastic container construction
